METRUM CRYOFLEX

WE BRING RELIEF

CRYOPROBES CATALOGUE

For CRYO - S Painless

THIS IS A MEDICAL DEVICE. USE IT IN ACCORDANCE WITH THE INSTRUCTIONS FOR USE OR LABEL.

CRYO - S Painless

Cryoanalgesia device. A medical device intended for professional use.

- **Microprocessor communication (RFID) allows for automatic configuration of the probe freezing algorithm**
- **Voice prompts allow you to focus only on the procedure**
- **Possibility of supplying with medical gases: N_2O or CO_2**
- **Touchscreen – easy setup of device functions**
- **Independent foot pedal - start/stop switch included**
- **Available with a customised trolley**
- **No additional technical assistance is required during the procedure**
- **Built-in neurostimulation module**
- **Weight: 12kg**

LEARN MORE

How to identify the cryoprobes?

ref. no.

S	N	0	2	3004	1

S - single use, sterile

N - cryoprobe with nerve stimulation (PNS)

0 - straight

2 - pain management

3004 - description

1 - detachable cryoprobe

How to order the probe?

Please indicate Order Number from the row with probe description.

order. no. **PA01N250002**

! *In care for highest quality of offered products and services, METRUM CRYOFLEX reserves the right to modify products and introduce changes in descriptions.*

PECTUS CRYOPROBE for use during thoracotomy and thoracoscopy procedures.

Advantages of the A-30/PEA/R/RF cryoprobe:

- **Anatomical bend** of the probe's freezing tip **(Golden Tip).**
- **No need to bend** the probe to get the **right point of contact** with the nerve.
- **A precisely controlled** freezing zone, limited to the gold-plated tip of the probe, ensures the safety of the procedure and **protects** adjacent tissues, including the lung and heart, from unintentional contact.
- Probe diameter – **only 3 mm**.
- Possibility of inserting the probe through a **small incision**, without the need for a trocar use (trocarless procerdure), in order to **simplify the procedure** and **reduce the risk of injury**.
- **Ergonomic** design of the probe handle.
- Starting the freezing procedure and ending the defrosting sequence **in just a few seconds.**
- **Precise control** of the freezing zone and **minimization of the risk** of allergic reactions, thanks to the use of a gold layer at the freezing end of the probe and the **elimination of insulators**.
- Possibility of supplying with medical gases: **$N_2$0** or **CO_2**.

REF. number

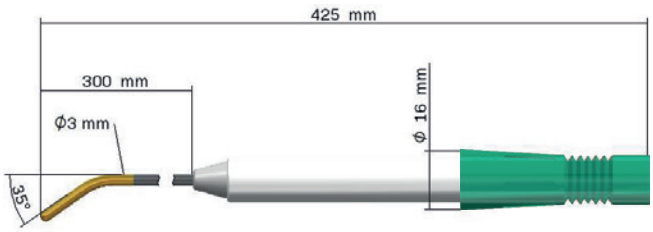
S 0 6 3030 1 0

Tip type

Round tip without neurostimulation, gold

Designed for

Cryoanalgesia of intercostal nerve - thoracotomy, VATS

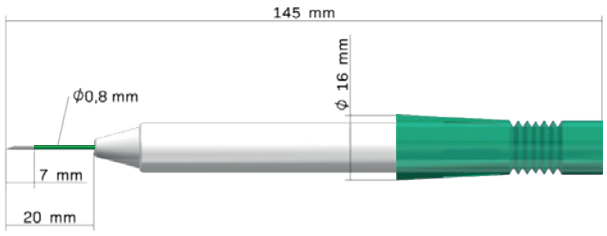


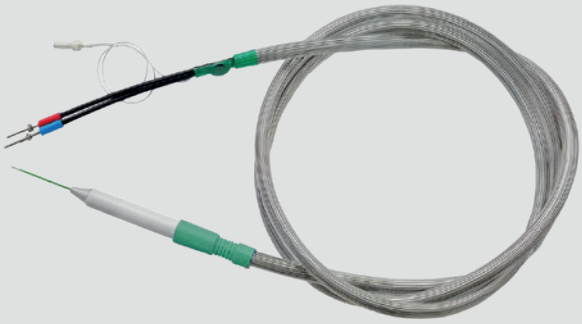
A-08/20/N/RF

REF. number
S N 0 6 0802 2 0

Tip type
Needle tip with neurostimulation

Designed for
Cryoanalgesia of the supraorbital, infraorbital, intraoral, auriculotemporal nerve



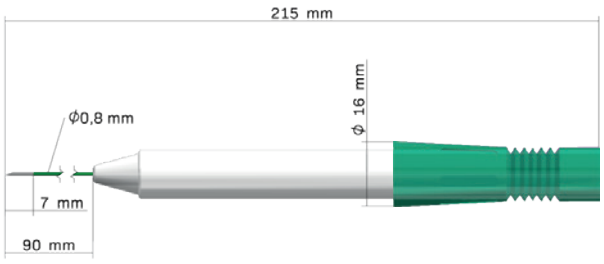


A-08/90/N/RF

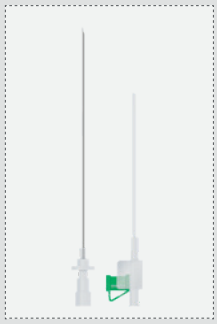
REF. number
S N 0 6 0809 2 0

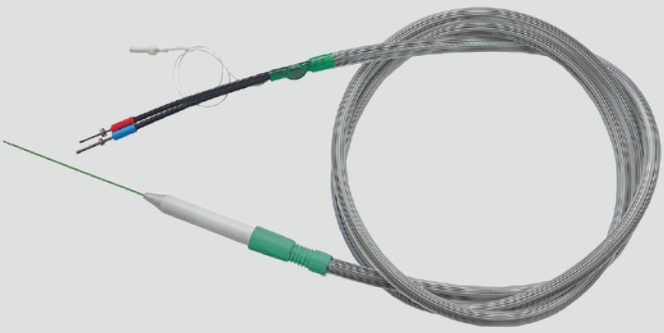
Tip type
Needle tip with neurostimulation

Designed for
Cryoanalgesia of the supraorbital, infraorbital, intraoral, auriculotemporal nerve



Green
BD catheter
included



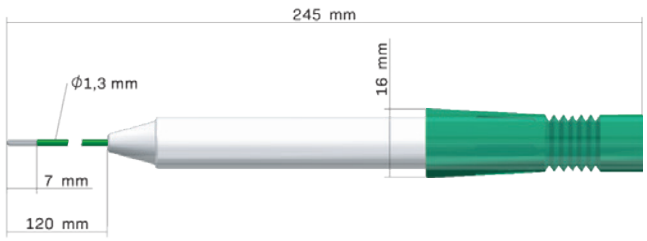


A-13/120/R/RF

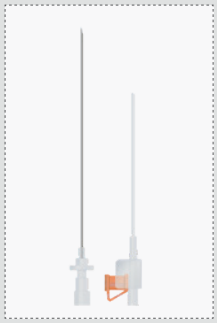
REF. number
S N 0 6 1312 1 0

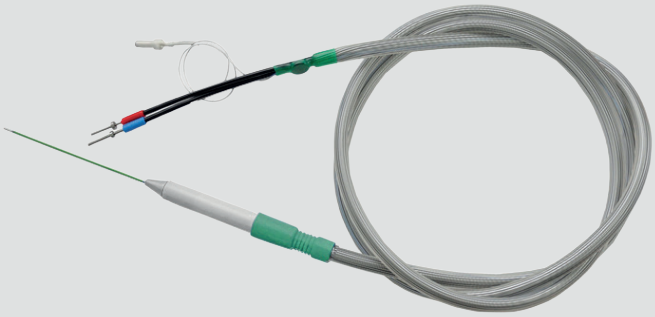
Tip type
Round tip with neurostimulation

Designed for
Intercostal nerves, facet joints in the cervical, thoracic, lumbar spine, cryoanalgesia of peripheral nerves and joints denervation



Orange BD catheter included



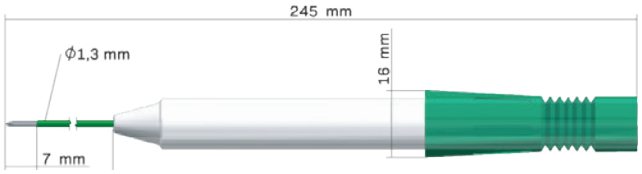


A-13/120/T/RF

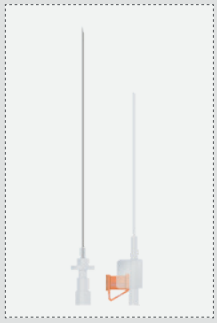
REF. number
S N 0 6 1312 0 0

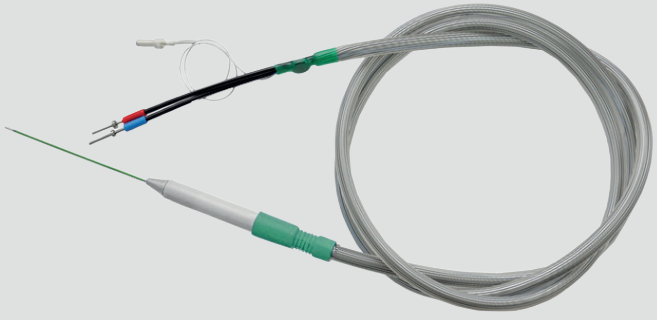
Tip type
Triangular tip with neurostimulation

Designed for
Facet joints in the cervical, lumbar spine, cryoanalgesia of peripheral nerves, and joints denervation



Orange BD catheter included



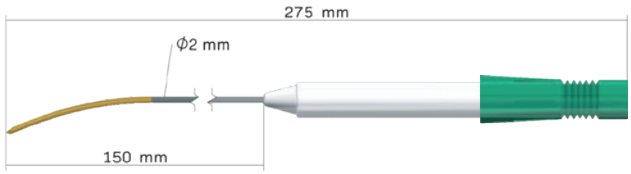


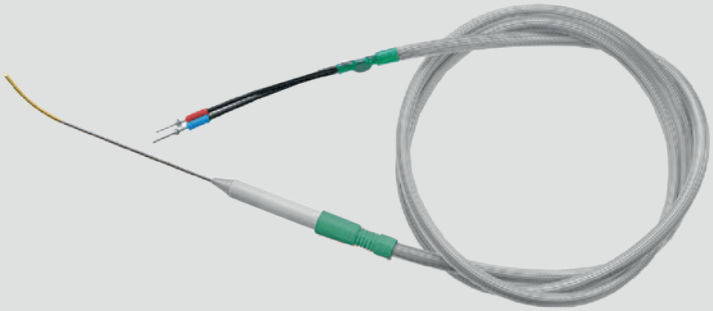
A-20/SIJ/T/RF

REF. number
S 0 6 3022 0 0

Tip type
Triangular tip without neurostimulation, gold

Designed for
Cryoanalgesia of sacroiliac joint



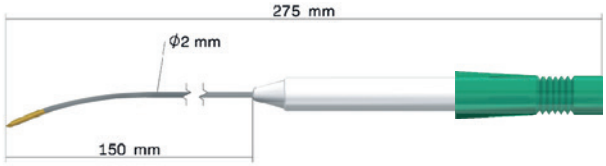


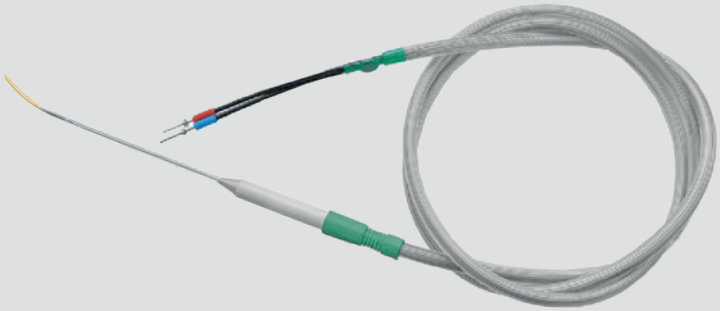
A-20/SIJ/T/RF (K)

REF. number
S 0 6 3022 01 0

Tip type
Triangular tip without neurostimulation, gold

Designed for
Recommended for Total Knee Arthroplasty





A-20/150/T/RF

REF. number

S N 0 6 3002 0 0

Tip type

Triangular tip with neurostimulation

Designed for

Facet joints in the lumbar, sacral, iliosacral spine, cryoanalgesia of peripheral nerves, and joints denervation
